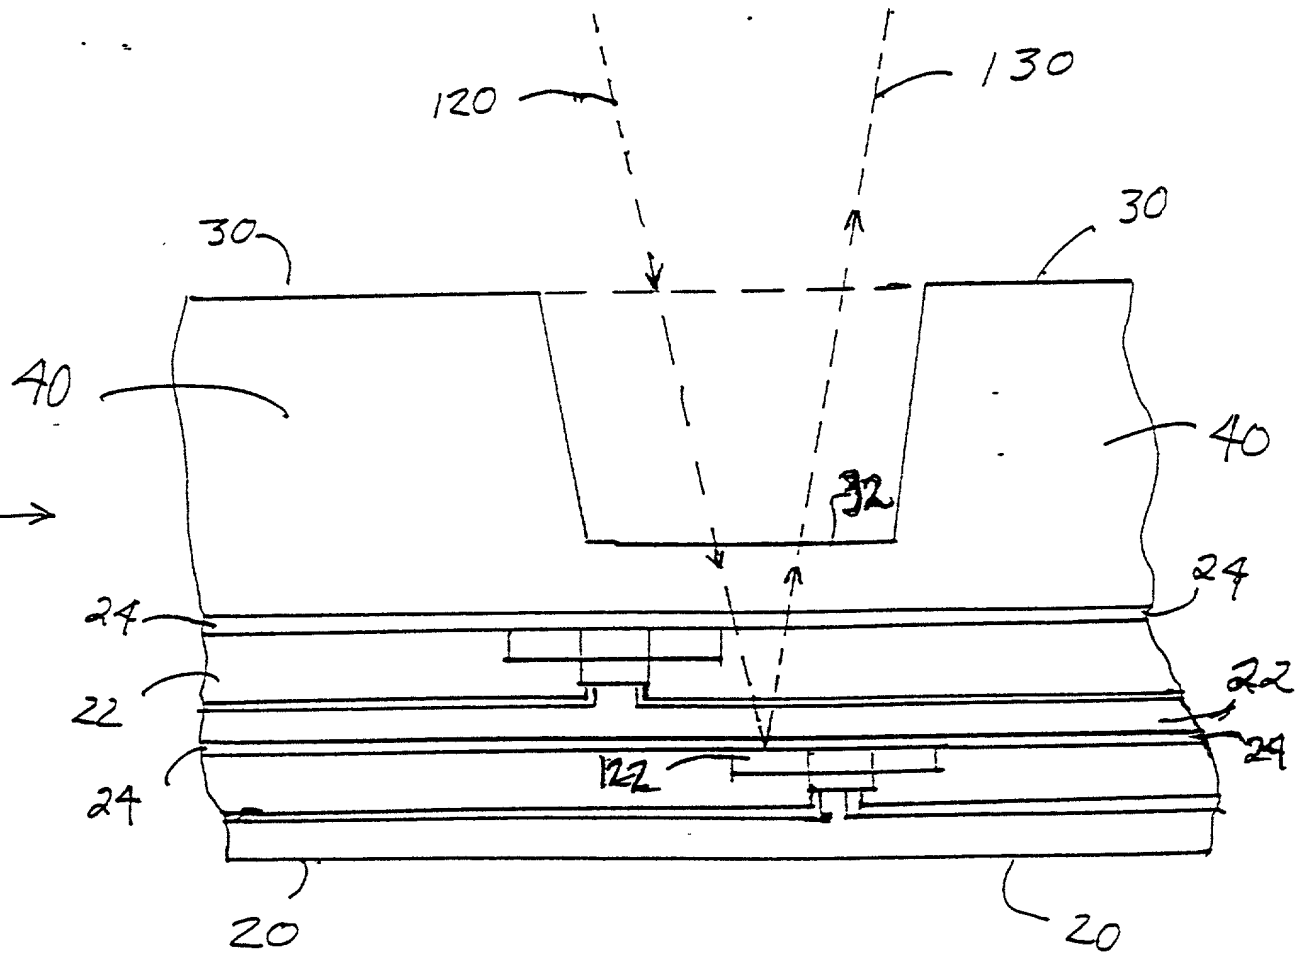

Fig. 1

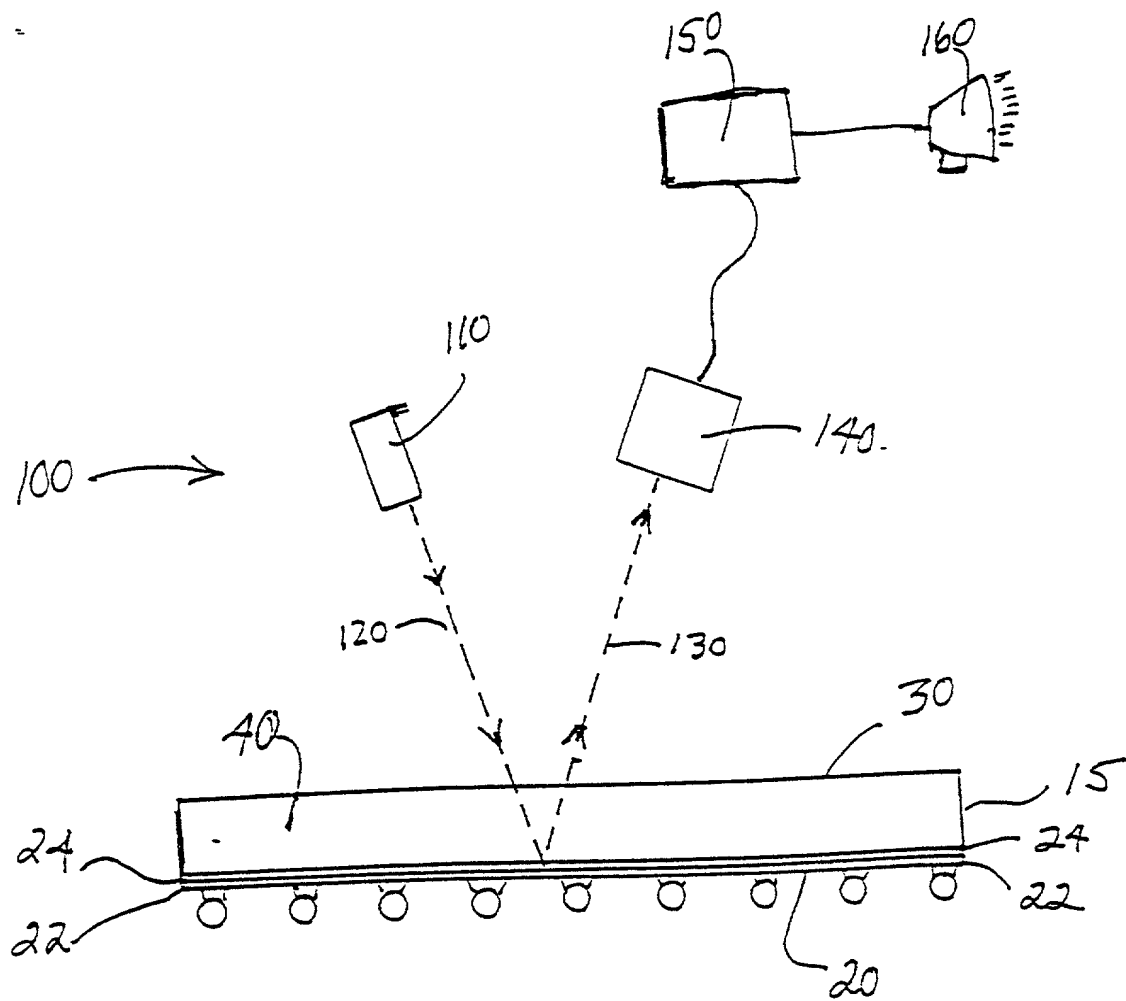

Fig 2

The graph displays two data series over time. The top series, represented by a solid black line, shows a series of peaks that increase in height and width over time, suggesting a growing or intensifying phenomenon. The bottom series, represented by a dashed black line, shows a series of smaller, more regular peaks that also show a slight upward trend, indicating a more stable but still evolving process. The x-axis is marked with vertical lines, and the y-axis is marked with horizontal lines, providing a grid for data interpretation.
